### **Rifle Marksmanship Instruction**

#### **Who we are and what we're about:**

The Appleseed Program is designed to take you from being simply a rifle owner to being a true Rifleman. A Rifleman has traditionally been defined as a marksman capable of hitting man-sized targets from 500 yards away – with an off-the-rack rifle. This 500-yard range is traditionally known as “the Rifleman's quarter-mile” -- a Rifleman can hit just about any target he can see. This skill was particularly evident in the birth of our country, and was the difference in winning the Revolutionary War. We will use the Army Qualification Test scaled for 25 meters.

#### **What You Will Learn?**

1. Sight Picture
2. Sight Alignment
3. Respiratory pause.

5. Squeeze the trigger.
6. Follow through, Call the shot.
