

M1 GARAND

RIFLE: M1 Garand
BARREL: 24", 1 in 10" Twist
CASE: Hornady/Frontier
PRIMER: Winchester WLR

BULLET DIAMETER: 0.308"
MAXIMUM C.O.L.: 3.340"
MAX. CASE LENGTH: ... 2.494"
CASE TRIM LENGTH: ... 2.484"

The M1 Garand has probably the most colorful history of any service rifle. It is a solid, strong design that provides outstanding reliability and performance. The M1 should by no means be overlooked as a service match rifle. It provides a lower cost way for a beginner to acquire a first rifle. An M1 Garand with a quality barrel, a properly assembled and bedded receiver, and shooting carefully prepared reloads, is easily capable of shooting one-minute-of-angle or better. Because of the 30-06 Springfield's capability to handle heavier bullets than the 308, the Garand can make an excellent long range rifle. Re-barreling the Garand in 308 is a common and safe practice, and usually can provide somewhat better accuracy than the 30-06. However, propellants that are at the slower end of the spectrum for the 308 for a given bullet weight are usually required to provide reliable functioning.

Hornady offers an outstanding selection of bullets for the M1 shooter. The 155 grain A-MAX provides a lightweight low recoil load with a high ballistic coefficient that can resist the wind. The 168 and 178 grain A-MAX bullets provide very long distance designs that the 30-06 can use extremely well in 1000 yard shooting. Our 168 Boat Tail Hollow Point bullet is an outstanding performer as well. In testing we achieved our best performance with VIHT N-150 powder. Good results were also obtained with VIHT N-140 and H 4895.
