

Dear Future Host:

So, you want to host an Appleseed? That's great, you will find it to be one of the most rewarding things you will ever do.

This packet attempts to give you the information necessary to locate a suitable range, and help convince the owner/club board to let us use it.

Most people don't realize that for RWVA to put on an Appleseed event, it takes somebody just like you to line up the range and get the word out.

This packet includes the following items:

- 1. This introduction letter**
- 2. Basic information for range selection and presentation:** This will educate you about what to look for in a range or undeveloped land. Also things you need to know and make sure landowners understand, that should help you get your foot in the door.
- 3. Additional Range Info:** This is good to give to the range owner/board, to help them understand our concept, facility impact, and our course of fire for the weekend.
- 4. Brochures:** to hand to the range owner/board members to help inform them about the program.
- 5. Appleseed Host Application:** This is for you to fill out when you've located a range. Do not panic about all the questions, remember, you are our eyes, we just want as much info as possible about what we are walking into. Please mail it back to RWVA as indicated on the back.
- 6. Quick Answers to Appleseed Questions:** This is a help to you and to the range in answering their questions. It will also help answer questions that will come up from their customers about what an Appleseed is.
- 7. What's Next:** So you've found the range, got the approvals, set a date, now what?

We would like to thank you in advance for your commitment, patriotism, and willingness to see this cause move forward.

If you have any questions or need further assistance, please feel free to contact any one of the RWVA Staff via the Forum or e-mail our scheduler at

Good Luck,
RWVA
